- **Frontend:** HTML, CSS, JavaScript, Responsive Design
- **Database:** MySQL, SQL
- **Software Development:** Full Stack Development, Frontend Development, Web Development

PROJECTS

Prediction of Cardiovascular Diseases — Deep Learning Researcher *CNN, Mobile-Net, Python, Deep Learning*

- Developed a deep learning model using CNN and Mobile-Net to predict cardiovascular diseases from retinal images
- Achieved accurate, lightweight, and performance by combining CNN's feature learning with Mobile-Net's efficiency
- Processed and trained on retinal datasets with proper preprocessing, achieving strong evaluation metrics
- Project was successfully published in the International Journal of Science, Engineering and Technology (IJSET)

Restaurant Application — Full Stack Developer

JSP, Servlets, JDBC, HTML, CSS, MySQL

<https://github.com/Basith-01/RestaurantApplication.git>

- Built a fully dynamic food ordering web application inspired by Swiggy/Zomato using core Java EE technologies without frameworks
- Integrated dynamic menu rendering, cart management with quantity updates, and order confirmation using JSP and Servlets
- Implemented user authentication with secure login/signup and database connectivity through JDBC
- Designed a responsive UI for smooth user experience across devices, enhancing front-end development skills

EDUCATION

B.Tech in Computer Science and Engineering

2021 – 2025

Sai Rajeswari Institute of Technology, Proddatur • CGPA: 8.0

Intermediate

2019 – 2021

Moulana Azad Junior College, Chagalamarri • CGPA: 9.2

High School (SSC)

2018 – 2019

ZP High School(Boys), Chagalamarri • GPA: 9.8

CERTIFICATIONS & ACTIVITIES

- Secured 2nd place in the Quiz competition conducted during the Technoholix Fest at college
- Certified in Java Full Stack Development from SkillDzire
- Completed NPTEL Certification in Cloud Computing with a score of 68%
- Earned Cybersecurity Training Certification by ICT Academy, sponsored by Honeywell
